Position: Custom Development Offering Lead

About Nexus Innovations

Technology and clients are at the core of what **Nexus Innovations** is all about and if you are a professional who is inspired by learning new technologies, personal growth, teamwork and serving others, you may find a great career fit at **Nexus Innovations**. We consider our employees our number one asset, and it shows in everything we do – from investing in their professional development to offering them a challenging, rewarding and supportive environment. The pace is fast; however, we also balance our work with life's priorities of family and community. Our company culture and values are key in assuring that trust and respect flourish with both clients and our teammates.

About the Position

If you are a technology professional who is inspired by leading and serving others, continuous learning, and being "in the arena" every day, you will love working at Nexus.

Nexus Innovations is looking for a Custom Development Offering Lead with technical architecture experience to guide our team and customers in our custom development offering. We are looking for passion and expertise more than a resume full of credentials. The right person is committed to being a true team player/leader, exercises sound judgement and guidance, and is hungry to grow.

Responsibilities include:

- Establish deep trust relationships with Nexus clients and team members
- Plan and lead Nexus Custom Development offering planning and improvement sessions to ensure the team is continually learning and growing in our approach and offering deliverables
- Mentor and provide guidance to Nexus team members and clients.
- Lead and guide the Nexus custom development team through the architecture, design, and development phase of creating custom software solutions for our clients.
- Architect and develop custom solutions leveraging Azure and related platforms.
- Serve as technical lead in customer sessions designed to develop solution design, migration, and modernization strategy

Beneficial Skills and Experience include:

- Experience in development tools and technology should include: Microsoft .NET, Web API, JavaScript (React, Node.js, etc.), Entity Framework, RESTful services, Microservices, SQL, Oracle
- Experience developing architectures in multiple domains -- infrastructure, security, software, and key software components
- Applicable knowledge of principles summarized in the Microsoft Cloud Adoption Framework
- Experience with IaaS and PaaS capabilities on cloud platforms
- Demonstrable hands-on experience in at least several of the following Platform Technologies: Azure App Services, Azure Functions, Kubernetes/AKS/OpenShift, Azure Storage, Azure Service Bus, Azure SQL Database, Redis Cache, Azure Search, Azure Monitor, Application Insights, Traffic Manager, Key Vault, Cosmos DB, Azure DevOps, Azure API Management, ARM templates, and general cloud governance and security mechanisms are required.
- Knowledge of modern data solutions such as Azure Data Factory, Data Lake, Data Bricks, SQL Data Warehouse, and Cosmos DB.
- Ability to communicate and present complex issues with preciseness, assurance, and confidence

Required Cultural Qualifications:

- Personable in interactions with teammates and customers.
- Willing to be the "Man in the Arena" by bringing a courageous and passionate approach to leading the team and customers.
- Prioritizes relationships more than who is right or wrong.
- Forthright individual who engages in open discussions with teammates that produce a positive result.
- Servant leadership mindset that prioritizes the success of the team and customers over individual success and recognition.
- Connector who proactively shares the right information with teammates and clients.
- Passionate about technology solutions and serving teammates and customers.
- Growth mindset – a focus on always looking to learn and improve, which includes a realistic understanding of your own strengths and weaknesses. Desire to improve personally and professionally.

Required Travel

- Minimal – average of 5-10 nights per year. We strive to keep our team at home each night with their families.
